Rogerio Mendonca

President, Freight Equipment

As President of the Freight Equipment business, Rogerio leads Wabtec's comprehensive global locomotive, mining, marine and drill portfolios. As a leading provider of equipment, Wabtec has an installed base of more than 23,000 locomotives globally.

A native of Brazil, Rogerio brings ~25 years of years of operations, commercial and executive leadership experience across diverse regions through challenging cycles, including more than 15 years in the transportation sector. Most recently, he served as Vice President for Baker Hughes, where he led the Global Flexible Pipes business to deliver strong operational results and significant growth in key markets including North America, Latin America, Europe, and the Middle East. Prior to that role, he was President of GE Oil & Gas in Latin America.

Rogerio also served as President of GE Transportation in Latin America, where he drove exponential growth across the region, implemented long-term service agreements and technology collaborations that serve as the backbone for Wabtec's growth in the market today, and led a manufacturing simplification and lean journey that delivered improved reliability, efficiency and productivity. Leading up to this role, he held several positions at GE Transportation that included Commercial Director and Service Operations General Manager.

Rogerio earned his Bachelor of Arts degree in Economics and International Trade from UFMG in Brazil.
